ISR to CSR : Our Journey Starts from Individual Social Responsibility (ISR) to achieve Corporate Social Responsibility (CSR) Being Socially Responsible means that people and organisations must behave ethically with sensitivity toward social, cultural , economic and environmental issues .Striving for social responsibility helps individuals , organizations and governments have a positive impact on development , business and society with a positive contribution to bottom-line results. All Social responsibility, both individual and corporate, is voluntary ; it is about going above and beyond what is called for by the law(legal responsibility). It involves an idea that it is better to be proactive toward a problem rather than reactive to a problem. Social responsibility means eliminating corrupt , irresponsible or unethical behavior that might bring harm to the community.
